Learning/teaching strategies and methods to enable learning outcomes to be achieved, including formative assessments

Lecture, Seminars/Workshops and Tutorials

Lecture:

- Purpose: - To deliver basic module material.
- Structure: Teaching is interactive with opportunities for individual and group formative exercises usually in 2-hour blocks. Teaching rooms will have access to electronic resources to support the lecture.

Seminar/workshop:

- Purpose: To develop teamwork skills and confidence in giving constructive feedback to fellow students.
- Structure: Sessions are normally conducted according to preparation for specific topics and provide a collegiate atmosphere to encourage students to interact with class members building their class, or 'team' knowledge and skills.

Tutorial:

- Purpose: To enable one-to-one dialogue and feedback
- Structure: Appropriate number of 10-minute tutorial slots arranged with each student as part of the teaching hours.

Self-directed study:

Each student is expected to undertake a minimum number of hours in individual study per week in order to support and build the skills, knowledge and understanding presented in each lecture and small group tutorial session per week. It is expected that students will increase the number of individual study hours as they approach formal assessment events. The ability for students to expand their learning by creating effective self-directed study patterns is a transferable skill deemed fundamental to further academic success as well as a key time-management tool.

All students have access to Brunel University Library which supports learners through a range of services. The library is well stocked with books and journals and citation indexes for researching further primary and secondary sources. There are also bookable group study rooms and access to specialist Librarians who can help with any enquiries.

All students have access to University ASK services and academic English support through IPLC.

Electronic journals and electronic books are available through Brunel University's e-resources gateway.

As appropriate, students can access Brightspace, the University Virtual Learning environment.

All students are provided with access to a range of online resources through the college student portal/learning environment.

Teaching and learning methods:

A range of teaching methods are used in this module: classroom lecture/seminar supported by a blended learning approach through the Virtual Learning Environment including the use of additional resources to support learning. The module delivery will focus mainly on face-to-face lectures and seminars with interaction through classroom based formative exercises which will enable individual and small group interaction. learning opportunities. In addition, the students will have the opportunity to develop a broader set of skills, including study skills, research skills, employability skills through teamwork (e.g., group project), guest speakers or workshop from relevant department.

Summative assessment strategies and methods to enable learning outcomes to be demonstrated.

Summative assessment methods are varied to ensure that students have a variety of learning opportunities throughout their programme. These will include: individual coursework; self-reflection report; personal development plan; group and individual report; final examination; research plan and presentation.
